CRM Development Proposal for V6 Autotech Solutions

This document presents the finalized development roadmap and commercial terms for a custom Customer Relationship Management (CRM) platform designed for **V6 Autotech Solutions**. The solution focuses on automating lead management, enhancing staff productivity through performance tracking, and providing advanced data analytics.

1. Scope of Work

The CRM will be built to handle the entire lifecycle of lead management as detailed in the technical specifications, including:

Functional Area	Core Features
Lead Architecture	Dynamic dashboards, lead import/export, unassigned lead queues, and lead transfer logic. Includes car-specific data fields (Make, Model, Year, KM).
Staff & Performance	Staff profiles, designation management, Leaderboards, and "My Performance" tracking for agents.
Automation & AI	Meta (Facebook/Instagram) lead synchronization, WhatsApp/SMS triggers, and an AI Manager for intelligent lead processing.
Advanced Reporting	Admin and Agent reports covering conversion rates, call status (Status 1/2/3), and source-wise lead analysis.
Utilities	File Manager for RC books/photos, task management, and notification system.

The Sales Hunter

2. Project Timeline

The project will follow an accelerated **4-week development cycle**:

- **Week 1:** System architecture, UI/UX wireframing, and database setup.
- **Week 2:** Development of Lead and Staff Management core modules.
- **Week 3:** Integration of Meta APIs, WhatsApp automations, and AI Manager logic.
- **Week 4:** Performance testing, bug fixes, and system deployment.

3. Commercial Terms

The total investment for the end-to-end development of the CRM system is **₹3,50,000**.

3.1 Payment Schedule

The project follows a milestone-based payment structure:

Milestone	Percentage	Amount (INR)
Project Kickoff / Advance	50%	₹1,75,000
Development Completion	30%	₹1,05,000
Final Deployment	20%	₹70,000

3.2 Exclusions & Paid Services

This proposal is strictly for the development and implementation of the software logic. The following items are explicitly excluded from this quote and are to be paid for/maintained directly by V6 Autotech Solutions:

- **Infrastructure:** Cloud hosting (e.g., AWS, GCP) and domain registration/renewal fees.
- **Third-Party APIs:** Costs for paid APIs such as the **Gemini API** (for AI Manager), WhatsApp Business API, and Meta Ad costs.
- **Maintenance:** Post-deployment maintenance and periodic technical support charges.

4. Execution & Support

Upon receipt of the 50% advance, the discovery and design phase will begin immediately. A dedicated developer will be assigned to ensure the system is ready for deployment within the 4-week window.
