Here's a **clear, real-world example of ClickUp hierarchy** using both **Marketing** and **Sales** so you can explain it easily in class 👇

🏗️ **ClickUp Hierarchy Example (Marketing + Sales)**

🔹 **1. Workspace (Top Level)**

👉 **Workspace Name:** Sales Hunter Company

This is your **entire organization**

📣 **2. Space: Marketing**

👉 This space handles all marketing activities

📂 **Folder: Social Media**

- Organizing content platforms

📋 **List: Instagram Content**

- Task: Create Reel on "AI Tools"
    - Subtask: Write script
    - Subtask: Shoot video
    - Subtask: Edit video
    - Subtask: Upload
- Task: Post Carousel

    - Subtask: Design creatives
    - Subtask: Write captions

📂 **Folder: Campaigns**

📋 **List: Lead Generation Campaign**

- Task: Run Facebook Ads
    - Subtask: Create ad copy
    - Subtask: Design creatives
    - Subtask: Launch campaign
- Task: Email Campaign
    - Subtask: Write email
    - Subtask: Upload contacts
    - Subtask: Send campaign

💼 **3. Space: Sales**

👉 This space handles revenue and clients

📂 **Folder: CRM**

📋 **List: Leads Pipeline**

Each **task = one lead**

- Task: John (Hot Lead)

    - Subtask: Initial Call
    - Subtask: Send Proposal
    - Subtask: Follow-up
- Task: Priya (Cold Lead)
    - Subtask: Intro Message
    - Subtask: Schedule Call

👉 Use **statuses as pipeline stages:**

- New Lead
- Contacted
- Qualified
- Proposal Sent
- Closed

📁 **Folder: Clients**

📋 **List: Active Clients**

- Task: ABC Company Project
    - Subtask: Requirement Gathering
    - Subtask: Development
    - Subtask: Delivery

🧠 **Simple Way to Explain to Students**

👉 “Marketing brings leads → Sales converts leads → Clients get delivered”

- Marketing = Content + Campaigns
- Sales = Leads + Deals
- Tasks = Actual work
- Subtasks = Steps to complete work

🎯 Quick Teaching Tip

Ask students:

👉 “If Instagram post is a task, what are subtasks?”
👉 “If a lead is a task, what actions are subtasks?”

This makes them **understand hierarchy instantly**

If you want, I can next:

- Convert this into **PPT slides**
- Give **live demo script**
- Or map this **exact structure into your CRM Django project**
